ASSET INFORMATION REQUIREMENTS

Hold asset workshops with FM teams to clarify operational expectations and exact delivery requirements.

EXCHANGE INFORMATION REQUIREMENTS

Develop collaborative exchange requirements based on organisational and project-specific information needs.

BIM EXECUTION PLAN

Through interactive sessions assist delivery teams in developing the workflows and processes necessary to achieve project success.

RESPONSIBILITY MATRIX

Clarify the level of information need for all aspects of the project and the parties responsible. Our RM goes the extra step in defining model production and delivery.

COMMON DATA ENVIRONMENT

From preparing a functional specification, through to configuration, implementation, roll-out, maintenance and management, Evolve concentrate on the process of collaboration.

MORE THAN JUST BIM COORDINATION

INFORMATION MANAGEMENT

- Clarify & document Asset Information Requirements for successful project scope and handover.
- Prepare Exchange Information Requirements
- Develop, monitor and manage adherence to project BIM Execution Plans
- Manage, federate and validate models and information into a Project Information Model
- Manage, validate and federate as-built models and data for development into Asset Information Model (AIM)
- Empower design teams and enable BIM processes and procedures
- Mentor, assist and impart knowledge at all stages of the process

INTERFACE MANAGEMENT

- Review design models and provide BIM coordination & clash detection reports
- Facilitate and lead BIM coordination meetings with design and construction teams
- Manage the process of tracking and auditing BIM coordination issues
