TRAINING SYLLABUS

MICROSTATION ADMINISTRATION WORKSHOP

no. of delegates Up to 6 maximum.

description This course continues the development of MicroStation and associated vertical products administration skills, fundamental to the concepts of configurations, interfaces and workspace components. Working together in your office we optimise your company-specific configurations and discuss alternative methods to help achieve your implementation aims. Course length is specific to the attendees need, from half a day to several days.

prerequisites The attendees should have undertaken the MicroStation Administration training course.

objectives This course aims at teaching attendees to customise their existing MicroStation set up in a networked environment and the principles of workspaces through the following areas:

1. CONFIGURATION REVIEW
 - Levels of configurations: system, application, organisation, workspace, workset, role, user
 - mslocal.cfg & ConfigurationSetup.cfg
2. YOUR WORKSPACE
 - Location & management
 - Standards folders & settings: Cells, dgnlibs, plot drivers, etc
 - COMPANY-Standards.cfg
 - Interfaces
3. EFFECTIVE USE OF CONFIGURATIONS
 - Additional applications
 - Users
 - Organisation level
 - Workspaces & how to use them for variances in standards
 - Workset configurations & templates
 - Using roles for individual teams or disciplines
 - Troubleshooting
 - Testing & revision control
