LAYER TOOL

CREATE LAYERS AND ENSURE THE WHOLE PROJECT TEAM USES THE CORRECT NAMING STANDARD

DOWNLOAD EVOLVELITE FROM HTTPS://EVOLVE-CONSULTANCY.COM/RESOURCES/ TODAY!

It has never been easier to create layers with the correct names. Evolve's LayerTool provides compliance to the major layering standards in the US, UK and across the world.

ISO 13567

- Comes pre-configured to support the mandatory fields in ISO 13567.
- Includes Element codes for Uniclass 2015 tables EF, Pr, SL, Ss and Zz,
- Use either full or 6-character Element codes.

BS1192

- For existing projects, BS1192 layer naming using Uniclass 1.4 is also supported.

GG184

- Full support for Highways projects extended conventions.

ONE COMPANY, ONE STANDARD

Works seamlessly with AutoCAD and MicroStation-based products to align all modelling and drawing production to a single unified standard.

EASY TO CONFIGURE

Set a simple variable to load the standard relevant to your project.

Configure colour, style and weight defaults and custom descriptions.

Automatically add sequential numbering to allow multiple generic layers.

FLEXIBLE LICENSING

Available as stand-alone, site-wide or corporate versions. No additional licensing management software needed.

NO ANNUAL SUBSCRIPTION FEES

Pay only for upgrades when you need them.
